Team reintroduction

Xufeng Liu-Front-End programmer

Yixu Zhou-Back-End programmer

Business need

Nowadays, thanks to the development of the video industry, there are so many different movies to choose from that audiences are often exhausted because they spend so much time without any idea.

Therefore, our system aims to analyze and recommend appropriate movies based on the movie-watching history provided by users, which can better solve the problem of movie selection. What's more, we will tell your user which platform the movie can display. Therefore, our user can get all platform movie recommendation.
