Yixu Zhou

User Testing Plan	
Project Name	IFoundMovie
Date Produced	2023/03/20
Date updated	2023/03/31
Test Target	Invite users to use our website and find out the bugs or some new improvements.
Test Plan	
<p>Invite users to use our final version website, if the users are non-technical. We just guide them to experience some main features of our website. For the technical users, we just let them feel free to explore the feature.</p>	
Outline	
<ol style="list-style-type: none"> 1. Invite the non-technical user to experience the basic interface and ask them to give us feedback. 	

<p>2. Guide the non-technical user to use our main features such as share function, comment function, AI recommendation function. Then ask them if there is something we need to improve.</p> <p>3. Invite a technical user to explore our website and ask him for feedback.</p>

User Testing Result

User1:

Test Objects	Comments
Interface	The dark color is good for movie websites, the problem is that the scrolling bar on the main page shows the latest movies rather than some random movies.
Main Features	Most of the features work well, the AI recommendation function is magic.

General Feedback	The interface is easy to understand and use, and most of the functions are good.
------------------	--

Changes:

- Change the content of the scrolling bar from random movies into latest movies.

User2:

Test Objects	Comments
Interface	The website is complete and most things work well. However, upcoming movies don't have a release date.
Main Features	The share function is very good, we can instantly know what your friends recommend.
General Feedback	Other than the questions raised, most things work well.

Changes:

- Access the TMDB website and collect the information of the release date.

User3: Tim

Test Objects	Comments
Interface	Looks good, the IFoundMovie icon can not jump to the main page. But, don't change it before the project day!
Main Features	Most features work fine.
General Feedback	Overall did well.

Changes:

- Add a jump link to the icon.

User Testing Conclusion

Users pointed out the problems of our website. For example, the scrolling bar of the main page should show the latest movies rather than some random movies. What's more, the upcoming movie should have the information of the release date. Finally, Tim asked us to give a jump link to the icon, it will make

users return to the main page more easily. The user test helps us find many potential problems or improvements. After we receive those feedback we just add them to our website to make it become better.
