

Risk Analysis

Project name: Movie recommend system

Risk1: Without enough time to achieve our app can be used in all of platforms. It will be double or triple the amount of work.

Solution: Try to only achieve one platform like desktop or web.

Risk2: Without enough knowledge about the AI, we have to learn it by ourselves like watching video or book.

Solution: If we have problem, we can ask our mentors also we take the machine learning in the next semester, we hope it works.

Risk3: We have no access to collect the enough data to train our AI model.

Solution: We may to ask some data from some website, or find some way to solve this problem.

If we find any new risk we will add here.
